Profile Summary

Senior DevSecOps Engineer & Cloud Architect with over 6 years of experience designing, securing, and automating multicloud infrastructure across AWS, GCP, Azure, DigitalOcean, and Kubernetes. Holds **AWS DevOps Engineer – Professional, AWS SysOps Associate, Certified Kubernetes Security Specialist and Administrator (CKS & CKA)** credentials, with deep expertise in CI/CD pipeline security, microservices orchestration, and AI-native application infrastructure. Proven track record of bridging software development and operations to build resilient systems and accelerate delivery across high-growth startup, enterprise, and banking environments.

Work Experiences

Senior DevSecOps Engineer, General Magic (Thailand) Co., Ltd. May 2024 – Present

- **Architect and maintain secure multicloud infrastructure** across AWS, GCP, and DigitalOcean (DOKS) hosting distributed agentic AI applications across multiple engineering teams.
- **Automate CI/CD pipelines** using GitHub Actions, embedding automated static security analysis (SAST) and container vulnerability scanning into the build lifecycle.
- **Drive GitOps adoption across EKS clusters**, pairing GitHub Actions CI with ArgoCD to decouple build pipelines from cluster deployment privileges and ensure declarative state management.
- **Manage and scale AI gateway infrastructure**, configuring LiteLLM proxies, vector databases, and multi-team API routing while enforcing security practices aligned with OWASP Top 10 for LLM Applications.
- **Standardize Infrastructure as Code (IaC)** using Terraform and Helm, cutting environment provisioning time while enforcing least-privilege IAM policies and zero-trust container networking.

DevOps Engineer, Yoma Bank Nov 2022 – Feb 2024

- **Engineered enterprise GitLab CI/CD pipelines** automating the build, test, release, and deployment cycles for core banking microservices within a strictly regulated environment.
- **Boosted deployment velocity and system reliability** across dev and ops teams by standardizing automated testing, containerization, and zero-downtime deployment strategies.
- **Implemented end-to-end monitoring and observability** using Prometheus and Grafana alongside custom internal logging solutions across Kubernetes clusters to track microservice health and accelerate incident response.

DevOps Engineer, Karzo Myanmar Co., Ltd. Mar 2022 – Nov 2022

- **Managed the end-to-end DevOps toolchain** for a logistics startup, streamlining code releases, database migrations, VM provisioning, and system integration testing.
- **Designed and maintained CI/CD pipelines** for core routing and fleet management services, reducing deployment downtime and manual release interventions.
- **Optimized cloud infrastructure utilization and spend**, auditing metrics to decommission idle workloads, right-size compute resources, and lower operational overhead.

Junior DevOps Engineer/Developer, Global Wave Technology May 2020 – Feb 2022

- **Engineered full-stack web and mobile applications** using .NET Core, Angular, Xamarin, and MySQL, delivering robust client features for enterprise projects.
- **Transitioned team workflows into early DevOps practices**, writing custom Bash/Shell scripts to automate build tasks, software packaging, and database deployments.

Skills

Cloud Infrastructure & Orchestration
Kubernetes (CKS, CKA), AWS (DevOps Pro & SysOps Certified), GCP, Azure, DigitalOcean (DOKS), Terraform (IaC), Docker, Helm, Rancher, Karpenter, Istio

AI & MLOps Infrastructure
Containerized AI Deployment, GPU Workload Orchestration, LiteLLM, Vector DB Infrastructure, OWASP LLM Top 10 Security

Programming & Scripting
Shell Scripting / Bash, Python, Go, Node.js, C# / .NET, TypeScript

DevOps & CI/CD Security
GitHub Actions, GitLab CI/CD, ArgoCD, SonarQube, Vulnerability Scanning, IAM & Network Security, Cloudflare

Observability & Systems
Prometheus, Grafana, Loki, Linux/Unix Administration, Incident Response

Education

Bachelor of Engineering in Computer Engineering and Information Technology (CEIT) 2013 – 2019
Yangon Technological University
CGPA | 4.0 / 5.0

Projects

Personal Portfolio & AI Agent [🔗](#), [aungmyatkyaw.cv](#) Ongoing
• Deployed decentralized Rust canisters on Internet Computer (ICP) featuring an interactive LLaMA 3.1 AI agent, prompt injection defense, and rate-limiting security.

MatrixLink | Founder & Full-Stack Architect [🔗](#), [portal.matrixlink.in](#) Mar 2026 – Present
• **Architected and operated an end-to-end SaaS control plane** for multi-server Outline VPN orchestration with automated capacity capping and least-loaded key assignment.
• **Built secure AWS cloud deployment pipelines** using AWS Lightsail, ECR, S3, CloudFront, and GitHub Actions, integrated with Trivy for container vulnerability scanning.
• **Engineered backend services and payment rails** using FastAPI, Next.js, PostgreSQL, and crypto top-up IPN webhooks for credit-prepaid access management.

Certificates

AWS Certified DevOps Engineer – Professional: [🔗](#) Credly - <https://bit.ly/4yh5f27>
AWS Certified SysOps Administrator – Associate: [🔗](#) Credly - <https://bit.ly/4gavwWl>
Certified Kubernetes Security Specialist (CKS): [🔗](#) Credly - <https://bit.ly/3v2wEt0>
Certified Kubernetes Administrator (CKA): [🔗](#) Credly - <https://bit.ly/48DAesj>
DevSecOps - Kubernetes DevOps & Security: [🔗](#) KodeKloud - <https://bit.ly/4d8QqV8>
GitLab CI/CD: Architecting, Deploying, and Optimizing Pipelines: [🔗](#) KodeKloud - <https://bit.ly/3xFN0ZQ>
EF SET English Certificate 74/100 (C2 Proficient): [🔗](#) Cert - <https://cert.efset.org/e9fFTA>
Istio by Solo.io Certifications: [🔗](#) Credly - <https://bit.ly/3Y1Clej>
DevOps on AWS Specialization: [🔗](#) Coursera - <https://bit.ly/3qFbwNa>
